skills

Languages:

Java, Rust, Python, C++,
TypeScript, SQL, Ruby,
CUDA, Verilog, VHDL

Frameworks:

React, Sprint Boot, Flask
Astro, Actix, Tailwind

Technologies:

AWS, Docker, K8s, Nginx
Jenkins, Gradle, Kafka,
Spinnaker, PyTorch

open sources

kefan.me | 🌐

Full-stack website built with **Astro** (SSR/SSG) and **Rust** backend, deployed via CI/CD. Achieved 90% font reduction and near-perfect Lighthouse scores through static-first optimization.

bamboo | 🌐

Cloud-deployed **TypeScript** Discord bot for 5K+ guilds, using WebSockets for real-time control and **FFmpeg**/Opus for low-latency streaming, with horizontal scaling and 99.95% uptime.

kotetsu | 🌐

IoT device for RPi written in **C**, featuring EPD display control via SPI, GSheets/libcurl API integration, and OTA update capability.

work experiences

HeyGen | Software Engineer

San Francisco, United States • Jul 2025 - Present

- Built an **LLM-powered retention agent** that reduced cancellation rate by **6%**, with Gemini SSE streaming chat, deep **intent understanding**, tool-calls, customized support flows, and **Redis + MySQL** session state.
- Migrated **2.5B+** asset records onto a unified backend table with new service and API layers, using dual-RW logic for zero-downtime cutover.
- Designed and shipped **50+** multivariate A/B experiments on Growth team with **PostHog** feature flags, owning from rollout through cleanup.
- Delivered full-stack features including mobile-web rebrand, apps-page shortcuts, and asynchronous workflows on **Temporal**.

Autodesk | Software Engineer

Toronto, Canada • Dec 2023 - Jun 2025

- Led the global bi-weekly releases of Fusion Team backend via **Jenkins CI/CD** and **Spinnaker** pipelines, automating **Amazon S3**-based secret rotations and **Aurora DB** upgrades.
- Implemented **canary deployments** with **Splunk & Grafana** monitoring for safe feature rollouts and real-time performance validation.
- Developed a **Python** health dashboard for Autodesk Fusion services.
- Engineered **Java Spring Boot** services, delivering 30% faster responses via **Redis** caching and **Elasticsearch** tuning.
- Introduced **Codacy** to enforce coding standards, resolving more than 75,000 style issues through **Gradle** task automation.

BetterUp | Software Engineer

San Francisco, United States • Jan - Apr 2022

- Built data pipelines with **Ruby on Rails** and **Ember.js**, optimizing ActiveRecord queries to reduce 95th percentile latency by 40%.
- Scaled unit test coverage to 80% with **RSpec** and **SemaphoreCI**.

... and five prior internships.

education

University of Waterloo

Bachelor of Applied Science - BASc
Computer Engineering 2018 - 2023
